

Pets are just like people: when travelling they have to face new emotions and this can be very stressful for them.

But human can have the opportunity to understand what is happening to them, and by means of logic, deal with any stressful situation.

Animals often do not understand what is happening and feel strong emotions that alter, often, their state of mind.

A great help can be made through the Bach Flower Essences.

Flowers are not medicines and do not have any side effects, can be taken without interfering with medications and other therapies in progress.

The Bach Flowers are a useful solution in the case of motion sickness (car sickness/ sea / air) and to balance the altered states of mind that may arise before and during the trip of your animal, such as fear of abandonment , fear of strangers or places in which they must pass, etc..

For each animal will be evaluated and selected ad hoc synergy floral (composed of multiple flowers) through a consultation with the owner.

Flowers will be given a week before the trip by the owner and, during the trip, the staff, according to the needs of each individual animal.

All this is to allow your pet, just to keep the peace while the distance from its human companion.

For consultancy please send an email to in-fo@relocat.it
